

Quick-test Benchtop Manifolds

Ideal for testing multiple pressure instruments at once up to 5000 psi (350 bar).

Features

- Calibrate multiple pressure gauges, transmitters or transducers at once
- Vertically mounted ports are spaced far enough apart so larger gauges will fit easily
- Quickly pressurize the system using a Ralston Quick-test hose
- Switch between pressure connections on devices under test without a wrench
- Compatible with all Ralston Quick-test NPT, BSP, Flare Gauge Adapters
- Excellent for calibrating multiple pressure instruments in a thermal chamber
- Second side connection can be used to daisy-chain multiple manifolds together
- Made in USA
